SHIPPING POINT:  
LENOIR, N. C.  
ELKLAND, N. C.

SPECIALTIES:  
AZALEA, HEMLOCK  
RHODODENDRON

TO THE TRADE:

Herewith is our offering of native collected stock for Spring 1929.

We have specialized in the collecting of native plants for a number of years, and our experience along this line enables us to offer you a dependable service.

We are located in the midst of the best Rhododendron section in the United States (Mountains of Western North Carolina). Consequently we are in a position to furnish the trade plants of thriftier growth and better color than can be secured from other sections. This applies to many other plants as well as Rhododendrons.

Furthermore, we wish to also call your attention to the fact that plants that are grown in an altitude from two to five thousand feet above sea level are naturally more hardy and stand northern climates better than plants collected or grown in a lower altitude. Our mountain climate is about the same as in many northern states.

We have the quantity, the quality and the organization to give you service. If you are in the market for Rhododendrons, Azaleas or anything listed in our line, but feel a hesitancy about placing your order on account of not having bought from us before, we will appreciate an opportunity of furnishing you names of other customers who buy from us regularly.

We allow 3% discount for cash with order. Regular terms, 30 days net, or 2% for cash in 10 days to parties with approved credit rating.

Quotations are for carload lots F. O. B. our shipping point, but orders for less than carload lots will be billed at list price and crating and packing charged for at actual cost.

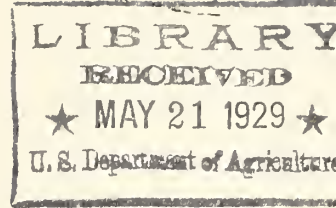

Respectfully,

WILDWOOD NURSERIES.

PRICE LIST - - - - SPRING 1929.

In regard to the quality of our plants: Azaleas are balled and burlapped and have from five to fifteen stalks to each plant. This applies to the Azalea calendulacea. The Azalea nudiflora and Azalea arborescens have from four to ten stalks.

Our Rhododendrons are all well balanced plants with good foliage, dug with heavy balls and have from six to fifteen stalks or more to the plant. The Rhododendron carolinianum is balled and burlapped, but Rhododendron catawbiense and Rhododendron maximum are dug with balls but not burlapped, as we are able to dig these plants under conditions where the soil will adhere to the roots sufficiently without being burlapped.

	1-2 ft.	2-3 ft.	3-4 ft.	4-6 ft.	6-8 ft.

WILDWOOD NURSERIES, BLOWING ROCK, N. C.

HARDY VINES, CLIMBERS AND CREEPERS.

	10	100	1000
<i>Epigaea repens</i> , trailing arbutus - - - -	1.00	7.50	60.00
<i>Lonicera japonica</i> , honeysuckle - - - - -	1.00	7.50	60.00
<i>Galax aphylla</i> , galax - - - - -	.75	5.00	40.00
<i>Gaultheria procumbens</i> , wintergreen - - -	.75	5.00	40.00
<i>Iris cristata</i> - - - - -	1.00	5.00	40.00

HARDY NATIVE FERNS.

	10	100	1000
<i>Polystichum acrostichoides</i> , evergreen - -	1.00	5.00	40.00
<i>Polypodium vulgare</i> , evergreen - - - - -	1.00	7.50	50.00
<i>Dryopteris marginalis</i> , evergreen - - - - -	.75	5.00	40.00
<i>Dryopteris spinulosa</i> , evergreen - - - - -	.75	4.50	35.00
<i>Adiantum pedatum</i> , maidenhair fern - - - -	.75	5.00	40.00
<i>Anthyrium filis-femina</i> , lady fern - - - -	1.00	7.00	60.00
<i>Struthiopteris germanica</i> , ostrich fern - -	1.00	7.00	60.00

Hardy ferns are very easy to grow in ordinary soil and are especially adapted to shady locations. We handle large quantities of the kinds listed above. Prices are for strong established roots and will make large well developed plants first season.

Note: We are very careful in selecting plants for shipment and you can feel assured that you will get from us nice shapely plants with good root system, and carefully packed so as to arrive in good condition.
